## Take control of cloud spend with Kalibr8's Automated Multi-Cloud cost optimization platform.

- Dramatically reduce cloud spend for your organizations and your end customers
- Accurately allocate costs
- Identify unmanaged resources
- Implement effective governance
- Automate cumbersome administration
- Serve multiple customers on a single platform
- Deliver valuable new services that more than pay for themselves

Optimize your cloud resources and deliver up to 65% monthly savings with the Kalibr8 platform, now enriched with deep analytics and machine learning.

- We analyze, we optimize, we automate
- Admins can view Azure through a single pane of glass
- Automate cloud resource optimization & cost management platform
- Our optimization platform is designed specifically for MSPs and two-tier distribution
- We provide the only100% channel automated cost optimization SaaS platform in the market
- With our latest release (January 2024), using AI and Machine Learning techniques, our platform implements ongoing policies to optimize cloud growth while controlling expenses
- Deliver valuable new services that more than pay for themselves

Cloud is the new normal, and with cloud costs spiraling out of control, smart MSPs are taking the lead in guiding their customers through the revolution.

MSPs must adapt to a completely new way of procuring IT infrastructure, moving from predictable upfront capital expenditure to variable consumption-based monthly bills and new procurement workflows from the growing number of B2B cloud marketplaces.

A Completely Modern Approach To Cloud Optimization, Now Featuring Singularity Advanced Analytics

Kalibr8 is fully automated and always on.

- Automated scheduling of cloud resources
- Automated scaling of 24x7 cloud resources
- Automated recommendation generation and optimization guidance

Kalibr8 doesn't require MSPs to do anything.

- We implement policies at a coded level for MSPs and their customers
- We track and report on back costs and saving analysis

Kalibr8 is continuously analyzing.

- Our Singularity software reports what is new, what growing, what is not
- Singularity measures and reports on levels of consumption and accurately shows the status of customers' cloud resources in near real time

No Scripts - No Coding - No Hassles

- Dramatically reduce cloud spend
- Accurately allocate costs
- Identify unmanaged resources
- Implement effective governance
- Automate cumbersome administration

Optimize your cloud resources and deliver up to 65% monthly savings

Singularity – Expansive + Customizable Analytics

- Automated functionality / Automated governance / Automated monitoring
- Designed specifically for MSPs
- Managed, automated schedules, PaaS scaling and optimization of end user cloud resources and budgets
- Drives exponentially more productivity: **Single Platform, Single Pane of Glass, Multi-Tenant, Multi Cloud**

Kalibr8 provides an automated cloud optimization & cost management platform with an intuitive and efficient "single pane of glass" view into all aspects that impact getting the most value for the least cost. Designed for Managed Service Providers, today, our platform securely manages Microsoft Azure assets with a goal to improve the economics and ROI. Coming soon, Kalibr8 for Google Cloud.
